Model Name: ShadeShield
275 Gallon (1000L) / 330 Gallon (1250L)

IBC TOTE COVER | USER GUIDE

Feature overview

SPECIFICATIONS

Material: 600D Oxford with blackout lining. UV-resistant and water-repellent.

Features: Top fill flap; full-side waterproof zipper; 50 cm front waterproof zipper; 4 corner buckle straps.

SIZE OPTIONS

275 Gallon (1000L): approx. 47 × 39 × 46 in
330 Gallon (1250L): approx. 47 × 39 × 53 in

Select the matching cover size. Measure your tote before use.

SETUP

1. Place tote on level ground (empty or full).
2. Face the top flap and front zipper toward your working side.
3. Drape over the top, align corners, and pull down on all sides.
4. Clip the 4 corner straps around the base and tighten.

DAILY USE

Refill: Open the top flap over the fill cap, add water, and reseal without removing the cover.
Check level: Unzip the full-side zipper, read the gauge, and zip closed.
Water: Open the 50 cm front zipper over the valve, run the spigot or hose, and zip closed.

CARE

Spot clean with mild soap and water; air dry. Keep zippers clean; lubricate if stiff. Store dry.

Note: For standard IBC totes. Provides shade, UV protection and weather cover only; not a structural support. Keep away from open flame and high heat.
